

DEFENDING AMERICAN LIBERTY

Connecting National Surveillance Threats to Kerr County

Liberty in Action Meeting | Kerr County, Texas | May 12, 2026

Digital Privacy • Data Centers • CBDC • FISA 702 • Local Control

YOU WILL BE ON YOUR BEST BEHAVIOR

THE ARCHITECTURE OF CONTROL

Federal mandates, state laws, local infrastructure, and new financial systems are being built in parallel to create a comprehensive surveillance and control grid. Each piece - sold as safety, convenience, or progress - locks in the next.

Age Verification & VPN Attacks

Utah model spreading - ID for internet + attacks on privacy tools

Phone KYC & TSA Biometrics

Government ID required for basic communication and travel

Flock ALPR & Kill Switches

Constant movement tracking + vehicle control mandates

Data Centers in Kerr County

Local water, power, health costs for the surveillance backbone

CBDC - Programmable Money

Real-time financial surveillance and account control

FISA 702 Warrantless Spying

Legal foundation for mass collection of Americans' data

DIGITAL SPEECH & PRIVACY UNDER ATTACK

Utah SB 73 & the Spreading Age Verification Assault

- ▶ Holds websites liable if Utah users access adult content via VPN or proxy that masks location
- ▶ Prohibits sites from sharing instructions on bypassing age checks with privacy tools
- ▶ Effectively treats any Utah VPN connection as physically in-state for government verification
- ▶ Model is spreading to social media, apps, and broader internet content in multiple states
- ▶ Forces ID upload and data collection under the banner of 'protecting children'

CLASSIC TROJAN HORSE

'Protecting children' is the pretext to normalize mandatory age verification (ID collection) across the internet. This directly feeds digital ID systems and destroys anonymity online. It also justifies attacks on VPNs. Conservatives should reject government control over what adults access privately and defend parental authority instead of bureaucratic mandates.

ID REQUIRED FOR BASIC LIFE

Phone KYC & TSA Biometrics: Government ID for Communication & Travel

FCC Phone KYC Proposal

Government-issued ID required before activating phone service. Creates another massive database of Americans' personal information. Name, address, ID number, and alternate phone - all collected before you can even make a call.

TSA Touchless ID Expansion

Facial recognition replacing physical ID at 65+ airports in 2026. Builds permanent biometric infrastructure at every major checkpoint. Your face becomes your ID - tracked and stored.

This is the administrative state inserting itself into everyday life. Phone service and air travel are not privileges to be conditioned on government ID and biometric enrollment. This is mission creep conservatives have long warned against.

DIGITAL ID MANDATES & THE GUARD ACT

Normalizing Persistent Government-Linked Identities & AI Speech Controls

- ▶ Hawley's GUARD Act pushes AI-powered age verification for social media and online platforms
- ▶ Requires platforms to verify age and identity before allowing access - massive data collection
- ▶ Creates centralized databases linking Americans to their online speech and activity
- ▶ Combined with state age verification laws, builds the infrastructure for digital ID
- ▶ Government and Big Tech gain unprecedented visibility into private communications and associations

TROJAN HORSE FOR CONTROL

Digital ID is the key that unlocks the entire surveillance architecture. Once your identity is persistently linked across platforms, devices, travel, and soon money (CBDC), the government gains real-time visibility into your life. Conservatives must reject this as incompatible with a free society. Parental authority, not federal databases, should protect children.

CONTROL OVER TOOLS & MOVEMENT

NY 3D Printer Mandates + Flock ALPR Cameras (National & Local Kerr County)

NEW YORK 3D PRINTER MANDATES (2026 Budget)

- Requires every 3D printer sold or used in NY to include built-in software that scans designs and blocks firearm-related prints
- Makes it a crime to sell, distribute, or possess digital design files for certain firearms without government license
- Direct attack on makers, innovators, hobbyists, and the right to manufacture for self-defense. Mandates surveillance software on personal property and criminalizes digital speech.

FLOCK SAFETY ALPR CAMERAS - MASS MOVEMENT TRACKING

- Automated License Plate Readers deployed by thousands of police departments, creating 24/7 records of vehicle movements
- Documented abuses: officers stalking romantic interests; data accessed by federal immigration authorities
- Right here in Kerr County: Commissioners Court approved ALPR cameras Dec '25 & March '26 via federal Stonegarden grants & Shider Tech LLC
- These systems log every vehicle's movements 24/7 on our local roads - warrantless surveillance sold as 'safety'

VEHICLE FREEDOM UNDER SIEGE

NHTSA Kill Switch Mandate + Ethanol 15 Approval - Forcing New Cars on Rural America

The NHTSA is pushing a mandate requiring 'impaired driving prevention technology' - effectively a vehicle kill switch - in all new cars. Combined with the EPA's recent nationwide E15 ethanol waiver, this creates a direct assault on vehicle ownership for millions of Americans, especially in rural areas like Kerr County.

- ▶ Pre-2001 vehicles are damaged by E15 ethanol - rubber seals, fuel systems degrade over time
- ▶ Owners face a choice: buy expensive ethanol-free gas (increasingly hard to find) or buy a new car
- ▶ New cars will come with government-mandated kill switches that can remotely disable your vehicle
- ▶ Rural Texans, seniors on fixed incomes, and working families lose affordable mobility and independence
- ▶ This is not safety policy - it is forced obsolescence and control over personal transportation

Liberty minded conservatives have long warned against government control over private property. Your car is an extension of your freedom - to work, to worship, to care for family. This combination of policies is designed to force Americans into new vehicles with built-in surveillance and control. We must oppose it.

THE LOCAL FRONTLINE: DATA CENTERS IN THE HILL COUNTRY

Water, Power, Noise, Health & Privacy Threats - The Physical Infrastructure of the Surveillance State

Electricity Price Spikes

Enormous power demand strains ERCOT grid. Residents face higher rates while data centers receive incentives and priority service.

Water Consumption Crisis

Evaporative cooling uses millions of gallons per day. In the Hill Country/Edwards Aquifer region, this competes directly with homes, farms, and municipalities - especially in droughts.

Noise, Light & Subsonic Health Impacts

24/7 industrial fans and generators create constant noise and light pollution. Families near similar facilities report subsonic/infrasound causing sleep disruption, headaches, nausea, anxiety, and persistent body pressure - 'living in hell.'

Eminent Domain for Power Lines & BESS

New high-voltage transmission lines and Battery Energy Storage Systems are being forced onto private land via eminent domain to power these corporate facilities.

THE FINANCIAL ENDGAME: CBDC

Central Bank Digital Currency - Programmable Money & Total Financial Surveillance

A Central Bank Digital Currency would let the government program money - decide where, when, and on what you can spend it. Every purchase tracked in real time. Accounts could be frozen or limited with a click. This is the ultimate tool of control.

- ▶ Programmable government money with built-in spending rules and expiration dates
- ▶ Every transaction tracked in real time by the central bank - complete financial surveillance
- ▶ Ability to freeze or limit accounts instantly for any reason - or no reason
- ▶ Trump Executive Order banned federal agencies from promoting or developing CBDC; we must make this ban permanent in statute
- ▶ Financial privacy is essential to Liberty. Without it, all other rights become conditional on government approval

This is the endgame. Once money is programmable and centrally controlled, dissent becomes expensive - literally. Conservatives must demand a permanent statutory ban on CBDC in the United States. Your wallet is not the government's to program.

THE SURVEILLANCE LEGAL FOUNDATION: FISA 702

Warrantless Spying on Americans - The Legal Shield for Mass Surveillance

FISA 702 allows warrantless collection of communications that sweeps in Americans' data. The FBI has conducted millions of improper 'backdoor' searches on Americans' communications. As Congress fights over reauthorization in 2026, real reform is essential.

- ▶ Section 702 permits warrantless collection of foreign communications - but routinely captures Americans talking to foreigners
- ▶ FBI has documented millions of improper searches of Americans' data without warrants or probable cause
- ▶ 2026 reauthorization fights are ongoing - reformers are pushing for warrant requirements for U.S. persons
- ▶ Without real reform, this remains the legal foundation for mass warrantless surveillance of American citizens
- ▶ This is a core 4th Amendment issue: government should not search your communications without a warrant

The 4th Amendment is not optional. Real reform means requiring warrants for any search of Americans' communications. Anything less is surrender to the surveillance state. Conservatives have always defended the Constitution - this is no exception.

WHY Liberty minded conservatives MUST OPPOSE

Core Principles That Demand Resistance to the Surveillance & Control Architecture

1

Individual Liberty Is a Fundamental Right

Not a privilege granted by government. Anonymity, privacy, and freedom from constant surveillance are core to the American experiment. We reject the idea that safety justifies surrendering these rights.

2

Rejects the Nanny State & Administrative Overreach

These policies expand the federal bureaucracy's power over everyday life - phones, cars, tools, speech, movement, and money. Conservatives have long fought this expansion of the administrative state.

3

Protects Parental Authority

Government should not insert itself between parents and children via age verification mandates or AI speech policing. Parents, not bureaucrats or algorithms, are the primary protectors of children.

4

Defends Constitutional Limits & Property Rights

The 4th Amendment, due process, and the right to own and use property without government backdoors or kill switches are non-negotiable. Eminent domain for corporate gain is abuse.

5

Stops the Surveillance State & Crony Capitalism

Centralized digital IDs, biometrics, movement tracking, programmable money, and data centers create infrastructure for social credit and authoritarian control. Local resistance defends privacy and Liberty.

WHAT WE CAN DO - DEFEND KERR COUNTY & AMERICAN Liberty

Demand Full Transparency Now

Insist Kerr County Commissioners release all documents, contracts, and studies related to any data center, power line, ALPR, or BESS proposals. No secret deals with NDAs.

Organize & Attend Meetings

Show up to Commissioners Court. Share stories of health impacts, property concerns, and privacy risks. Build a broad coalition of landowners, families, and patriots.

Contact State Representatives

Urge them to support moratoriums or strong local control over data centers and supporting infrastructure. Oppose eminent domain abuse for private corporate gain.

Protect Your Own Privacy & Property

Use VPNs and resist digital ID/biometric enrollment. Document and report any health effects from noise or subsonic issues near proposed sites. Secure your communications.

Vote for Property Rights Champions

Support candidates who will defend Kerr County's land, water, peace, and privacy against Big Tech and Big Government overreach. Local control starts with local leadership.

Liberty **REQUIRES** VIGILANCE

Starting Right Here in Kerr County

"Those who would give up essential Liberty, to purchase a little temporary Safety, deserve neither Liberty nor Safety."

Data centers bringing higher utility bills, subsonic health impacts, light and noise pollution, and eminent domain for power lines and BESS are not progress - they are the physical infrastructure of the surveillance state arriving in our own backyard.

**Defend your property. Defend your health. Defend your privacy. Defend local control.
We must oppose the entire architecture of digital and physical control.**
